

Extra Curricular Activities at

Brookfield State School

Get ready to spark your child's curiosity and problem-solving with our fun-filled robotics program! As automation shapes the future, this hands-on exploratory 8-week course is the perfect introduction to the concept of robotics. Using the LEGO robotic systems (WeDo and Spike), students will work together to build and program their very own robots, learning how things move, work, and interact. Guided by experienced and enthusiastic coaches, kids will gain confidence as they explore, ask questions, and discover creative solutions – all while having a blast building the robots of tomorrow!
